The Examiner's amendment above was made to correct a minor typographical error and to improve the consistency of claim terminology and are purely non-substantive as they do not affect the scope of the claimed invention.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art of record, including the documents submitted in applicant's IDS filed 11/22/06, and newly cited

document US Patent No. 6,779,063 to Yamamoto, fails to teach a storage system comprising a first connection unit, between a set of disk drive units and a plurality of disk array controllers, that is configured such that any of the disk array controllers can communicate with any of the disk drive units; and a second interface between a plurality of file servers and the disk drive units, *wherein any of the file servers can communicate with any of the disk drives via a connection that does not include any of the disk array controllers* in combination with the other recited claim elements (emphasis added). U.S. Patent No. 6,779,063 to Yamamoto teaches a similar system comprising the disk drives, the plurality of disk array controllers, the file servers, and at a first connection unit, however, *the system of Yamamoto establishes a connection between the any of the file servers and any of the disk drives that includes the disk array controllers* (emphasis added).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
